Ymeetee

Team Meetings – your key to efficient and successful business

Ymeetee Server is deployed as on-premises to provide real-time collaboration applications to bring distributed teams together

1. **Web conferencing** – share computer screens / interact
2. **Webinar** – no download to join
3. **Audio Conference** – computer and telephone lines
4. **HD video conference** – Support up to 30 webcams. From 2 participants up to a maximum of 600 participants . Different layouts, screen resizing, content sharing and recording. With 3 models to choose from with varying capacities.

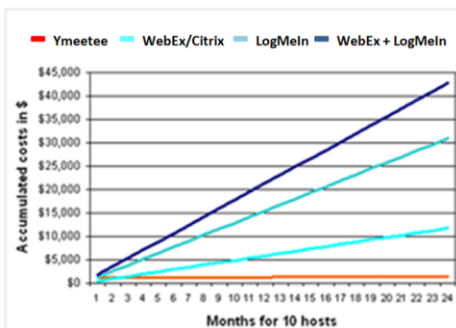

The problems experienced with current Hosted Service Providers

- Named licensing from hosted services are not cost effective. They are too expensive to have every employee use the productivity tool that your company needs

- It is difficult and expensive to manage several vendors for different collaboration tools

- Hosting service providers put internal collaboration sessions at security risk, monitored by 3rd parties or government agencies
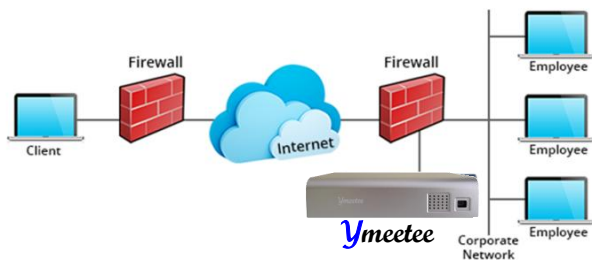

Collaborate Anytime Anywhere........

Ymeetee solutions

Ymeetee server uses floating licenses. This allows you to provide collaboration/productivity tools to every employee --- at no additional cost. Plus, your Ymeetee server can be paid off within 6-12 months of subscription fees for hosted services. LDAP integration is available for fast and easy deployment. Your Ymeetee server will rapidly deliver a productivity boost to everyone in your organization. It is unmatched by any hosted service provider.

Ymeetee server comes with real-time integrated collaboration applications in order to meet every employee's collaboration needs regardless of their department or location

Ymeetee on-premise server secures internal collaboration sessions enforced by your firewall.

The Values

1. Supports unlimited hosts. Floating licenses.
2. On-Premise: Security, Branding, Integration
3. Universal attendance capability. Platform independent.
4. Plug and Play. No IT maintenance needed
